Designed for the 2-semester anatomy and physiology course, Principles of Anatomy and Physiology combines exceptional content and outstanding visuals for a rich and comprehensive classroom experience. Enhanced for a digital delivery, the 15th edition, gives students the ability to learn and explore anatomy and physiology both inside and outside of the classroom. Anatomy & Physiology for the Manual Therapies 1e is designed to meet the specific needs of students preparing for careers in the manual therapies, such as massage therapy and careers as physical therapy assistants. This book provides the most appropriate depth of coverage for each body system -- in both narrative and visuals -- and by including relevant applications linking the content to situations they will face in their careers. Specially written applications with a focus on massage and physical therapy are included. An outstanding illustration program is also integrated to highlight important concepts and special diagrams are presented that point to origin, insertion, and innervation of muscles. This is crucial knowledge for massage therapists, physical therapists, and occupational therapists. The second edition is designed to help allied health professionals keep their focus, make connections, and improve their overall understanding of the anatomy and physiology they need to succeed in the field. Each chapter is written and developed into manageable modules of content that place a conceptual order on the facts and terminology. Relevant clinical stories draw readers in, keep them connected to the content and provide the platform for developing critical thinking skills. The focused narrative is accompanied by outstanding illustrations that help allied health professionals learn key concepts. Like its predecessors, this new edition offers a balanced introduction to the human body especially developed to meet the needs of the one-semester course. It provides an effective blend of stunning art and clearly written text to illuminate the complexities of the human body.
