Postcommunism and the Body Politic Aug 21 2019 The epidemic of mass rape in the former Yugoslavia has illustrated once again, and in particularly brutal fashion, the inextricable relationship between national politics, sexual politics, and body politics. The nexus of these three forces is highly charged in any culture, at any time in history, but especially so among cultures in which rapid, even cataclysmic, changes in material realities and national self-conceptions are eroding or overwhelming

previously secure boundaries. The postcommunist moment in the so-called Second World--Central and Eastern Europe and the former Soviet Union--has dramatically exposed the opportunities and dangers that arise when the political, cultural, and economic foundations of a society are de- and then re-structured. Gender roles and relations, expressions of sexuality or attempts to recontain them, representations of the body, especially the female body, and the larger, cultural meanings it assumes, are particularly marked sites to witness the performance of complex national dramas of crisis and change. This groundbreaking volume turns its attention to the Second World, specifically to such subjects as the birth of the sex media and porn industry in Russia; Russian women and alcoholism; cinema in post-communist Hungary; patriotism and gender in Poland; sexual dissidence in Eastern Europe; and women in the former Yugoslavia. >[go to the Genders website]

Immortality and the Body in the Age of Milton Oct 15 2021 Seventeenth-century England teemed with speculation on body and its relation to soul. Descartes' dualist certainty was countered by materialisms, whether mechanist or vitalist. The most important and distinctive literary reflection of this ferment is John Milton's vitalist or animist materialism, which underwrites the cosmic worlds of Paradise Lost. In a time of philosophical upheaval and innovation, Milton and an unusual collection of fascinating and diverse contemporary writers, including John Donne, Margaret Cavendish, John Bunyan, and Hester Pulter, addressed the potency of the body, now viewed not as a drag on the immaterial soul or a site of embarrassment but as an occasion for heroic striving and a vehicle of transcendence. This collection addresses embodiment in relation to the immortal longings of early

modern writers, variously abetted by the new science, print culture, and the Copernican upheaval of the heavens.

Religion and the Subtle Body in Asia and the West Jul 12 2021 Subtle-body practices are found particularly in Indian, Indo-Tibetan and East Asian societies, but have become increasingly familiar in Western societies, especially through the various healing and yogic techniques and exercises associated with them. This book explores subtle-body practices from a variety of perspectives, and includes both studies of these practices in Asian and Western contexts. The book discusses how subtle-body practices assume a quasi-material level of human existence that is intermediate between conventional concepts of body and mind. Often, this level is conceived of in terms of an invisible structure of channels, associated with the human body, through which flows of quasi-material substance take place. Contributors look at how subtle-body concepts form the basic explanatory structure for a wide range of practices. These include forms of healing, modes of exercise and martial arts as well as religious practices aimed at the refinement and transformation of the human mindbody complex. By highlighting how subtle-body practices of many kinds have been introduced into Western societies in recent years, the book explores the possibilities for new models of understanding which these concepts open up. It is a useful contribution to studies on Asian Religion and Philosophy.

The Body Project Apr 09 2021 A hundred years ago, women were lacing themselves into corsets and teaching their daughters to do the same. The ideal of the day, however, was inner beauty: a focus on good deeds and a pure heart. Today American women have more social choices and personal freedom than ever before. But fifty-three percent of our girls are dissatisfied with their bodies by the age of thirteen, and many begin a pattern of weight obsession and dieting as early as eight or nine. Why? In The Body Project, historian Joan Jacobs Brumberg answers this question, drawing on diary excerpts

and media images from 1830 to the present. Tracing girls' attitudes toward topics ranging from breast size and menstruation to hair, clothing, and cosmetics, she exposes the shift from the Victorian concern with character to our modern focus on outward appearance—in particular, the desire to be model-thin and sexy. Compassionate, insightful, and gracefully written, *The Body Project* explores the gains and losses adolescent girls have inherited since they shed the corset and the ideal of virginity for a new world of sexual freedom and consumerism—a world in which the body is their primary project.

The Politics of the Male Body in Global Sport Oct 03 2020 Danish sport has been associated with Europe and the World; not least through I.P. Muller and Niels Bukh and the Danish Gymnastics revolution with its emphasis on male aesthetics and hygiene in the first half of the twentieth century. At the same time, Denmark has stood apart from Europe in the early moments of its history of sport with the rural revolution of the farming communities as a statement of political independence and assertion. However, during the German occupation of Denmark, Danish sport was part of a European collaboration which characterized a number of the occupied countries not least in the Nordic area. After the Second World War, Denmark embraced international body cultures with other European nations in particular Eastern martial arts. Denmark too, as part of trends in the European region and the world, became caught up in sport as a powerful contemporary political statement. This book was previously published as a special issue of the *International Journal of the History of Sport*.

The Spectacle of the Body in Late Medieval England Apr 21 2022 The volume *The Spectacle of the Body in Late Medieval England* represents a study on the human body representation in medieval England by approaching the concept of the spectacle as a space of manifestation. The author clarifies the ways of understanding the body as a physical and metaphorical reality, but also the medieval conceptualization of violence. On top of that, the author is making an investigation on the violent character of spectacles' representation in pursuit of picturing this subject more clearly and more relevant. The approach of the volume is dominantly Christian reviewing the representations of the body through outstanding figures of Christianity (crucifixion of Jesus Christ, body of Virgin Mary).

The Body in Late Medieval and Early Modern Culture Mar 28 2020 Taking as its chronological starting-point the female body of late medieval devotional literature, the volume moves on to a consideration of the representation of gendered bodies in later literature. It then proceeds to examine sixteenth-century occupational orderings of the (male) body in education, the civil service and the army, and involves explorations into a variety of rituals for the purification, ordering and disciplining of the flesh. It includes enquiries into the miraculous royal body, demon bodies, the 'virtual' body of satire, and ends the late seventeenth century with dramatic representations of the diseased body, and

the grotesque bodies of travellers' tales as signifiers of racial difference. It pushes forward post-modern notions of the body as a site for competing discourses. It provides new dimensions to fantasies, rituals and regulations in narratives ('fictions') of the body as identifications of forms of knowledge unique to the early modern period. Each of the essays sheds new light on how these late medieval and early modern narratives function to produce specialized and discrete languages of the body that cannot be understood simply in terms, say, of religion, philosophy or physiology, but produce their own discrete forms of knowledge. Thus the essays materially contribute to an understanding of the relationship between the body and spatial knowledge by giving new bearings on epistemologies built upon pre-modern perceptions about bodily spaces and boundaries. They address these issues by analysing forms of knowledge constructed through regulations of the body, fantasies about extensions to the body and creations of bodily, psychic, intellectual and spiritual space. The essays pose important questions about how these epistemologies offer different investments of knowledge into structures of power. What constitutes these knowledges? What are the politics of corporeal spaces? In what forms of knowledge about spatial and bodily perceptions and practices are these early modern narratives embedded? What ideologies shape and contain them? The collection deliberately incorporates a period range which encompasses considerable cultural and ideological shifts that impact upon perceptions of the body. The choice of essays in the volume recognizes both continuities and discontinuities between perceptions of the body in the medieval and early modern periods.

Rethinking the Body in South Asian Traditions Jun 23 2022 This book analyses cultural questions related to representations of the body in South Asian traditions, human perceptions and attitudes toward the body in religious and cultural contexts, as well as the processes of interpreting notions of the body in religious and literary texts. Utilising an interdisciplinary perspective by means of textual study and ideological analysis, anthropological analysis, and phenomenological analysis, the book explores both insider- and outsider perspectives and issues related to the body from the 2nd century CE up to the present-day. Chapters assess various aspects of the body including processes of embodiment and questions of mythologizing the divine body and othering the human body, as revealed in the literatures and cultures of South Asia. The book analyses notions of mythologizing and "othering" of the body as a powerful ideological discourse, which empowers or marginalizes at all levels of the human condition. Offering a deep insight into the study of religion and issues of the body in South Asian literature, religion and culture, this book will be of interest to academics in the fields of South Asian studies, South Asian religions, South Asian literatures, cultural studies, philosophy and comparative literature.

The Making of the Modern Body Sep 21 2019 Scholars have only recently discovered that the human body itself has a history. Not only has it been perceived, interpreted, and represented differently in

different epochs, but it has also been lived differently, brought into being within widely dissimilar material cultures, subjected to various technologies and means of control, and incorporated into different rhythms of production and consumption, pleasure and pain. The eight articles in this volume support, supplement, and explore the significance of these insights. They belong to a new historical endeavor that derives partly from the crossing of historical with anthropological investigations, partly from social historians' deepening interest in culture, partly from the thematization of the body in modern philosophy (especially phenomenology), and partly from the emphasis on gender, sexuality, and women's history that large numbers of feminist scholars have brought to all disciplines.

Human Rights and the Body Mar 20 2022 *Human Rights and the Body* is a response to the crisis in human rights, to the very real concern that without a secure foundation for the concept of human rights, their very existence is threatened. While there has been consideration of the discourses of human rights and the way in which the body is written upon, research in linguistics has not yet been fully brought to bear on either human rights or the body. Drawing on legal concepts and aspects of the law of human rights, Mooney aims to provide a universally defensible set of human rights and a foundation, or rather a frame, for them. She argues that the proper frames for human rights are firstly the human body, seen as an index reliant on the natural world, secondly the globe and finally, language. These three frames generate rights to food, water, sleep and shelter, environmental protection and a right against dehumanization. This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law.
