**Cyber-Bullying** Sep 28 2019 This book looks in depth at the emerging issue of cyber-bullying. In this increasingly digital world cyber-bullying has emerged as an electronic form of bullying that is difficult to monitor or supervise because it often occurs outside the physical school setting and outside school hours on home computers and personal phones. These web-based and mobile technologies are providing young people with what has been described as: ‘an arsenal of weapons for social cruelty’. These emerging issues have created an urgent

need for a practical book grounded in comprehensive scholarship that addresses the policy-vacuum and provides practical educational responses to cyber-bullying. Written by one of the few experts on the topic Cyber-Bullying develops guidelines for teachers, head teachers and administrators regarding the extent of their obligations to prevent and reduce cyber-bullying. The book also highlights ways in which schools can network with parents, police, technology providers and community organizations to provide support systems for victims (and perpetrators) of cyber-bullying.

**A History of Law in Canada, Volume Two** Aug 27 2019 This is the second of three volumes in an important collection that recounts the sweeping history of law in Canada. The period covered in this volume witnessed both continuity and change in the relationships among law, society, Indigenous peoples, and white settlers. The authors explore how law was as important to the building of a new urban industrial nation as it had been to the establishment of colonies of agricultural settlement and resource exploitation. The book addresses the most important developments in the seventeenth, eighteenth, and nineteenth centuries, including legal pluralism and the co-existence of European and Indigenous law. It pays particular attention to the Métis and the Red River Resistance, the Indian Act, and the origins and expansion of residential schools in Canada. The book is divided into four parts: the law and legal institutions; Indigenous peoples and Dominion law; capital, labour, and criminal justice; and those less favoured by the law. *A History of Law in Canada* examines law as a dynamic process, shaped by and affecting other histories over the long term.
