International Handbook of Interpretation in Educational Research Feb 23 2022 This handbook focuses on the often neglected dimension of interpretation in educational research. It argues that all educational research is in some sense 'interpretive', and that understanding this issue belies some usual dualisms of thought and practice, such as the sharp dichotomy between 'qualitative' and 'quantitative' research. Interpretation extends from the very framing of the research task, through the sources which constitute the data, the process of their recording, representation and analysis, to the way in which the research is finally or provisionally presented. The thesis of the handbook is that interpretation cuts across the fields (both philosophically, organizationally and methodologically). By covering a comprehensive range of research approaches and methodologies, the handbook gives (early career) researchers what they need to know in order to decide what particular methods can offer for various educational research contexts/fields. An extensive

overview includes concrete examples of different kinds of research (not limited for example to ‘teaching’ and ‘learning’ examples as present in the Anglo-Saxon tradition, but including as well what in the German Continental tradition is labelled ‘pädagogisch’, examples from child rearing and other contexts of non-formal education) with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice – combined in each case with consideration of the role of interpretation in the process. The handbook includes examples of a large number of methods traditionally classified as qualitative, interpretive and quantitative used across the area of the study of education. Examples are drawn from across the globe, thus exemplifying the different ‘opportunities and constraints’ that educational research has to confront in different societies.

Extreem eigenaarschap Oct 02 2022 In ‘Extreem eigenaarschap’ vertalen Jocko Willink en Leif Babin de krachtige leiderschapslessen van het slagveld naar heldere principes die toegepast kunnen worden in ieder team en elke organisatie. Toen de Navy SEAL-taskforce van Willink en Leif in 2006 in Irak voor een mission impossible stond: Ramadi veiligstellen, een stad die al min of meer als verloren wordt beschouwd, wisten Willink en Babin onder extreme druk hun team naar de overwinning te leiden. De overwinning is grotendeels te danken aan een teamcultuur van eigenaarschap en discipline. Leiderschap, op ieder niveau, blijkt de doorslaggevende factor voor het succes van het team. In ‘Extreem eigenaarschap’ delen ze niet alleen hun eigen oorlogservaringen, maar ook praktijkverhalen van de bedrijven die ze na hun militaire loopbaan zijn gaan coachen. Met dit meeslepende boek, waarvan wereldwijd al bijna twee miljoen exemplaren verkocht werden, kun je direct aan de slag met de principes van extreem eigenaarschap.

Bandung, Global History, and International Law Jan 25 2022 In 1955, a conference was held in Bandung, Indonesia that was attended by representatives from twenty-nine nations. Against the backdrop of crumbling European empires, Asian and African leaders forged new alliances and established anti-imperial principles for a new world order. The conference came to capture popular imaginations across the Global South and, as counterpoint to the dominant world order, it became both an act of collective imagination and a practical political project for decolonization that inspired a range of social movements, diplomatic efforts, institutional experiments and heterodox visions of the history and future of the world. In this book, leading international scholars explore what the spirit of Bandung has meant to people across the world over the past decades and what it means today. It analyzes Bandung's complicated and pivotal impact on global history, international law and, most of all, justice struggles after the end of formal colonialism.

Information Technology in Medical Diagnostics II Nov 03 2022 For many centuries, mankind has tried to learn about his health. Initially, during the pre-technological period, he could only rely on his senses. Then there were simple tools to help the senses. The breakthrough turned out to be the discovery of X-rays, which gave insight into the human body. Contemporary medical diagnostics are increasingly supported by information technology, which for example offers a very thorough analysis of the tissue image or the pathology differentiation. It also offers possibilities for very early preventive diagnosis. Under the influence of information technology, 'traditional' diagnostic techniques and new ones are changing. More and more often the same methods can be used for both medical and technical diagnostics. In addition, methodologies are developed that are inspired by the functioning of living organisms. *Information Technology in Medical Diagnostics II* is the second volume in a series showing the latest advances in information technologies directly or indirectly applied to medical diagnostics. Unlike the previous book, this volume does not contain closed chapters, but rather extended versions of presentations made during two conferences: XLVIII International Scientific and Practical Conference 'Application of Lasers in Medicine and Biology' (Kharkov, Ukraine) and the International Scientific Internet conference 'Computer graphics and image processing' (Vinnitsa, Ukraine), both held in May 2018. *Information Technology in Medical Diagnostics II* links technological issues to medical and biological issues, and will be valuable to academics and professionals interested in medical diagnostics and IT.

In Spite of You May 29 2022 In October 2018 Brazilians elected Jair Bolsonaro as their new president. A former army officer who served under the military dictatorship, Bolsonaro has spent his political career campaigning against democracy and human rights. His

notoriety comes from his repeated racist, sexist and homophobic statements and his defense of torture, extra-judicial executions and impunity for Brazil's security forces. Bolsonaro is sometimes described as a "Tropical Trump." But this wording greatly underestimates the threat that he poses to Brazil's still young and fragile democratic institutions. *In Spite of You* brings together voices of the new Brazilian resistance. It includes chapters by Dilma Rousseff, former president of Brazil, political prisoner and torture survivor; Fernando Haddad, former minister for education and mayor of São Paulo, who was defeated by Bolsonaro in the 2018 election; and Eugenio Aragão, former minister for justice in President Dilma's last government. It also gives a voice to feminists, environmentalists, land rights activists and human rights defenders, explaining the background to Bolsonaro's election and setting out a manifesto for reviving democracy in Brazil. Contributors: Eugenio Aragão, Rubens Casara, Sérgio Costa, Vanessa Maria de Castro, Fabio de Sá e Silva, Michelle Moraes de Sá e Silva, Paulo Esteves, Conor Foley, Gláucia Foley, Fernando Haddad, Monica Herz, Fiona Macaulay, Renata Motta, Dilma Rousseff and Márcia Tiburi. ?Conor Foley is a Visiting Professor at the Pontifical Catholic University of Rio de Janeiro and has worked on legal reform, human rights and protection issues in over thirty conflict zones. His previous books include, *Protecting Brazilians Against Torture*, *Another System Is Possible* and *The Thin Blue Line*.

Curcumin for Neurological and Psychiatric Disorders Sep 20 2021 *Curcumin for Neurological and Psychiatric Disorders: Neurochemical and Pharmacological Properties* focuses on the different molecular mechanisms underlying curcumin-mediated beneficial effects in neurological diseases. The book's editors discuss the neurochemical and pharmacological properties of curcumin, followed by the effect of curcumin in neurotraumatic diseases, neurodegenerative diseases, and neuropsychiatric diseases. The book also offers a perspective on future studies on the treatment of neurological disorders. The beneficial effects of curcumin have been observed both in cultured cells and in animal models, thus paving the way for ongoing present and future human clinical trials. Curcumin produces antioxidant and anti-inflammatory effects not only by blocking oxidative stress and neuroinflammation in neurotraumatic and neurodegenerative diseases, but also by restoring cellular homeostasis and rebalancing redox equilibrium. Identifies molecular mechanisms of curcumin effects in neurological diseases Includes effects on neurotraumatic, neurodegenerative and psychiatric diseases Covers the antioxidant, anti-inflammatory and immunomodulatory effects of curcumin Examines curcumin's potential in developing new therapeutic drugs

Oost-Weststraat May 05 2020 *De fenomenale voorganger van De rattenlijn over de oorsprong van genocide en misdaden tegen de menselijkheid* 'Een monumentale prestatie [...] een ingrijpend persoonlijk verslag over de oorsprong van misdaden tegen de menselijkheid en genocide, verteld met liefde, woede en precisie.' John le Carré Als mensenrechtenadvocaat Philippe Sands wordt uitgenodigd om een college te geven in de West-Oekraïense stad Lviv, ontdekt hij een reeks buitengewone historische toevalligheden. Dit is het begin van een speurtocht die hem de halve wereld over zal voeren op zoek naar de oorsprong van het internationaal recht en zijn eigen geheime familiegeschiedenis, beginnend en eindigend met de laatste dag van de Neurenbergprocessen. Drie mannen vormden de leidraad voor Sands' zoektocht: mensenrechtenadvocaten Raphael Lemkin en Hersch Lauterpacht, de grondleggers van de

begripen 'genocide' en 'misdaden tegen de menselijkheid', en Hans Frank, Hitlers advocaat en leider van de nazibezetting in Polen. Het resultaat is een indrukwekkend boek over de Galicische wetten, dat laat zien hoe de wereld na de Tweede Wereldoorlog op juridisch gebied worstelde met iets overweldigends als massamoord. 'Al met al een onontwarbaar mengsel van grote en kleine geschiedenis, een magistraal voorbeeld van naspurwerk, van minimalistische details die door grote vasthoudendheid een totaalbeeld opleveren van een ontluisterend noodlot ... dat je als lezer dagenlang in zijn ban houdt.' Cees Nooteboom, De Groene Amsterdammer 'Voor wie wil weten welke rol het Haagse Internationale Strafhof vervult, is Sands' boek niet te versmaden.' Trouw Over De rattenlijn: 'Het resultaat is een rijkgeschakeerd verhaal met personages die volop tot de verbeelding spreken.' ••••• NRC Handelsblad

Tecnologias e Educação: Inovações Curriculares na Concepção Docente Oct 10 2020 A chegada dos computadores portáteis à escola apresenta-se, a princípio, como uma possibilidade de democratização do acesso e uso das tecnologias conectadas à internet sem fio, mas a seguir esse processo revela a complexidade do encontro de culturas em práticas que são desafiadas a se transformar diante do novo potencial para a interação, a produção de conhecimento e o acesso a distintas fontes de informação. Este livro mostra o estilo incomum de Lina M. Gonçalves em construir sua narrativa a partir das recordações de docentes sobre a própria prática e sobre o currículo escolar. Mais do que colher depoimentos, Lina colocou-se junto das professoras entrevistadas e com elas criou um coro harmônico em que se mesclam representações, significados e afetos, revelando os sentidos da vida na escola com suas cores, luzes e sombras, sons e imagens, espaços e tempos. [...] A leitura deste livro incita o leitor a compreender os significados e sentidos atribuídos por professores sobre a integração curricular das Tecnologias Digitais de Informação e Comunicação (TDIC), fornece referências teóricas e práticas para a recontextualização desse processo a outras situações e para a ressignificação das políticas públicas de tecnologias na educação pautadas pelo reconhecimento da TDIC como prática social, linguagem de representação do pensamento, partilha e negociação de significados, produção de sentidos e criação de culturas. The Right to Life under International Law Jun 29 2022 The Right to Life under International Law offers the first-ever comprehensive treatment under international law of the foundational human right to life. It describes the history, content, and status of the right, considers jurisdictional issues, and discusses the application of the right to a wide range of groups, such as women, children, persons with disabilities, members of minorities, LGBTI persons, refugees, and journalists. It defines the responsibility of not only governments but also the private sector, armed groups, and non-governmental organisations to respect the prohibition on arbitrary deprivation of life. It also explains the nature and substance of the duty to investigate potentially unlawful death as well as the mechanisms at global and regional level to promote respect for the right to life.

Entre o Prazer e a Dor, o (Des)Encanto da Profissão Docente Sep 08 2020 A obra Entre o Prazer e a dor, o (des) encanto da profissão docente apresenta um olhar sobre os problemas enfrentados no dia a dia escolar pelos professores pedagogos, levando em conta as

transformações sociais e como estas podem influenciar a vida dos professores, trazendo muitas vezes prejuízos à saúde. A obra traz as principais queixas dos professores em relação ao trabalho, que vão desde a falta de apoio de seus superiores, a falta de limites por parte de alunos, o desrespeito à figura do professor, a desvalorização da categoria, os baixos salários e os ambientes com excesso de barulho e calor excessivo, fatores esses que contribuem para o mal-estar docente. Traz também relatos de professores que encontram motivações a partir de si próprios e desenvolvem técnicas de automotivação para conseguirem lidar com as dificuldades do dia a dia, superando seus medos e angústias. Por seu conteúdo marcante e sua linguagem dinâmica, esta leitura torna-se uma excelente fonte de erudição e discernimento a todos que se interessam em conhecer um pouco mais sobre essa importante profissão, buscando compreender os principais problemas que se abatem sobre essa classe de profissionais. As exigências sociais, as pressões e cobranças aferidas pela busca da qualidade e eficiência, a inserção do ser humano em uma sociedade em acelerada evolução, trazem novos desafios à profissão docente. Os professores, no entanto, nem sempre encontram condições para responder a essas exigências e aspirações de forma adequada, seja por falta de recursos, seja pela burocracia e metodologias ultrapassadas que não dão conta de favorecer a criticidade e a autonomia dos alunos; isso se traduz em inquietações para o professor, gerando insatisfação.

Profiling zwischen sozialer Praxis und technischer Prägung Sep 01 2022 Fabia Schäufele untersucht, wie die Technisierung von Tätigkeiten die Einflussverteilung in den sie umsetzenden sozio-technischen Konstellationen verändert. Die Autorin geht dieser Frage

im Rahmen einer vergleichenden Studie von Profiling-Prozessen – zu Sicherheits- und Überwachungszwecken – an Flughäfen und beim Credit-Scoring nach. Sie knüpft dabei theoretisch an den techniksoziologischen Diskurs der Handlungsfähigkeit von Technik an und zeigt – mithilfe der erweiterten Skriptanalyse – wie technisches Wirken differenziert analysiert und verglichen werden kann.

Manual of Romance Phonetics and Phonology Jan 05 2023 This handbook is structured in two parts: it provides, on the one hand, a comprehensive (synchronic) overview of the phonetics and phonology (including prosody) of a breadth of Romance languages and focuses, on the other hand, on central topics of research in Romance segmental and suprasegmental phonology, including comparative and diachronic perspectives. Phonetics and phonology have always been a core discipline in Romance linguistics: the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects, and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages. This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into (incipient, ongoing, or concluded) processes of phonological change. The volume can be read both as a state-of-the-art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology.

Glossário de Ciências em Libras: Uma Proposta Pedagógica Bilingue para Alunos Surdos Jan 13 2021 Quando o tema é educação

de surdos, ainda temos grandes desafios a enfrentar; um deles, certamente, é a escassez de materiais didáticos adequados às especificidades desses estudantes. No cotidiano, faltam, ainda, recursos que contribuam para uma real compreensão dos conceitos ensinados em sala de aula. Desse modo, buscando contribuir para o desenvolvimento de práticas pedagógicas que respeitem a singularidade linguística dos estudantes surdos, este livro apresenta a proposta de um Glossário de Ciências em Libras, com os termos mais usados em classes inclusivas do 6o ao 9o ano do Ensino Fundamental.

A Formação do Optometrista no Brasil Feb 11 2021 Esta obra relaciona os Campos da Optometria e da Educação, contextualizando a profissão de Optometrista, o curso de Formação Inicial, o Currículo e as Instituições de Ensino Superior que os propõem. Aqui, se assinala uma compreensão crítica desses processos e se explicita suas relações com a Ciência e com o capitalismo neoliberal, ao tempo em que se indica alternativas profissionais, formativas e curriculares não restritas à visão ideológica hegemônica vigente. No horizonte de uma formação inicial mais humana, em que se considere a subjetividade como um furo na racionalidade científica, esta obra apresenta algumas reflexões sobre o Currículo e a Formação Inicial de Optometristas na Contemporaneidade, indicando a necessidade de diferenciação e subversão da sua atual institucionalidade notadamente tecnicista, mecanicista, mercantilista e alienante. Reflete sobre a necessidade de se ampliar a compreensão de "tecnologia", considerando-a tratar-se dos princípios de transformação e de criatividade inerentes ao próprio Ser humano, não se restringindo ao uso de qualquer aparato maquínico/instrumental, tampouco às formas de como utilizá-los ou criá-los. Ao tempo em que estabelece proposições na forma de indicadores para uma possível ressignificação curricular, esta obra inaugura uma discussão epistemológica nesse ponto, configurando-se numa importante contribuição para o desenvolvimento da formação inicial de Optometristas no Brasil, e para o aprofundamento teórico na área.

Langzame man Jul 07 2020 Toen hij door de lucht vloog dacht hij nog direct weer op te kunnen staan, even diep adem te halen, en dan weer door te fietsen. Maar nu zit hij thuis, een been tot boven de knie geamputeerd. Met tegenzin probeert hij te wennen aan het idee dat er nu dagelijks een verpleegster over de vloer komt. De eerste is een regelrechte ramp. De tweede, een Kroatische, handig, stevig en niet onaantrekkelijk, brengt Paul Rayment echter al snel op andere gedachten. Langzame man is een uitmuntende familieroman, een treffend en dikwijls komisch boek, waarin de lezer met een paar principiële vragen wordt geconfronteerd. Waarom hebben we pas echt het gevoel dat we leven als we voor een ander kunnen zorgen? Hebben mensen zonder kinderen iets essentieels gemist? En buitendien, wat is echte liefde? Het beste boek van de afgelopen tien jaar. Arnon Grunberg in de Volkskrant

Caminhos para o Desenvolvimento Sustentável Aug 08 2020 A Agenda 2030, aprovada em 2015 por todos os Estados membros da ONU, tem como objetivo principal contribuir para o alcance dos 17 Objetivos de Desenvolvimento Sustentável - ODS, com foco na melhoria das condições de vida no planeta e enfrentamento dos desafios globais, como por exemplo as mudanças climáticas, a erradicação da pobreza, a preservação dos recursos naturais, a produção de energia limpa e acessível, o acesso à água potável e ao saneamento, entre outros. O sucesso desta Agenda dependerá do trabalho interdisciplinar de pesquisadores, cientistas e líderes que estejam à altura da tarefa. Mas também de muitos que são divulgadores desta nova oportunidade que se apresenta à humanidade e nos conscientiza de sua natureza categórica. Espera-se que esta coletânea, realizada por autores de diversas áreas do conhecimento, atenda às expectativas dos interessados, especialistas ou não, e que se torne uma referência para o início de uma reflexão interdisciplinar sobre essa problemática tão urgente, que precisa estar estabelecida no coração das pessoas, na boca da sociedade e na cabeça e ação dos tomadores de decisão, uma vez que, embora possa parecer clichê, a batalha pela sustentabilidade e, claro, pela durabilidade das condições do nosso planeta é uma responsabilidade de todos.
