Helps students to test their knowledge and gain crucial exam practice. Does your child: • Have impressive intellectual abilities but seem puzzled by ordinary interactions with other children? • Have deep, all-absorbing interests or seemingly encyclopedic knowledge of certain subjects? • Bring home mediocre report cards, or seem disengaged at school, despite his or her obvious

intelligence? If you answered "yes" to these questions, this book is for you. Author Katharine Beals uses the term "left-brain" to describe a type of child whose talents and inclinations lean heavily toward the logical, linear, analytical, and introverted side of the human psyche, as opposed to the "right brain," a term often associated with our emotional, holistic, intuitive, and extroverted side. Drawing on her research and interviews with parents and children, Beals helps parents to discover if they are raising a left-brain child, and she offers practical strategies for nurturing and supporting this type

of child at school and at home. Beals also advises parents in how best to advocate for their children in today's schools, which can be baffled by and unsupportive of left-brain learning styles. Experiencing emotions is a part of the richness of life. But sometimes emotions can get in the way of our health and happiness. Suppressing strong feelings like fear, anger, and resentment isn't the answer—in fact, doing so can lead to a host of physical problems, from a weakened immune system to heart disease. On the other hand, overreacting in the heat of the moment can be detrimental to relationships. So,

how can you ride even the strongest waves of emotion without causing harm to yourself or others? This workbook offers a breakthrough, eight-week program using emotion theory and mindfulness-based techniques to help you manage the overwhelming thoughts and feelings that cause you pain. You'll learn to approach your emotions without judgment, understand their source, and foster forgiveness and kindness toward both yourself and others. Instead of trying to bury feelings or lashing out and hurting relationships, you'll learn how to cultivate emotional balance using this

powerful program. Student Writing Activities Workbook and Audio Activities Student Edition 30 Days to Success From the father of guerrilla marketing, Jay Conrad Levinson! practice and guides the students through the activities on the Audio CDs. This workbook combines methodology and practice for beginning translators with a solid proficiency in French. It assumes a linguistic approach to the problems of translation and addresses common pitfalls, including the delineation of "translation units", word polysemy, false cognates, and structural and cultural obstacles to literal translation. The first part of the book focuses on specific strategies used by professionals to counter these problems, including transposition,

modulation, equivalence, and adaptation. The second part of the book provides a global application of the techniques taught in the opening sections, guiding the student

through step-by-step translations of literary and non-literary excerpts. The revised edition clarifies some of the finer points of the translation techniques

introduced in the first edition, provides extra practice exercises, and offers information on a website that can be used in class.
